Finding a Replacement for the Soul - Brett BOURBON - 2009-06-30
Approaching the study of literature as a unique form of the philosophy of language and mind--as a study of how we produce nonsense and imagine it as sense--this is a book about our human ways of making and losing meaning. Brett Bourbon asserts that our complex and variable relation with language defines a domain of meaning and being that is misconstrued and missed in philosophy, in literary studies, and in our ordinary understanding of what we are and how things make sense. Accordingly, his book seeks to demonstrate how the study of literature gives us the means to understand this relationship. The book itself is framed by the literary and philosophical challenges presented by Joyce's Finnegan's Wake and Wittgenstein's Philosophical Investigations. With reference to these books and the problems of interpretation and meaning that they pose, Bourbon makes a case for the fundamental philosophical character of the study of literature, and for its dependence on theories of meaning disguised as theories of mind. Within this context, he provides original accounts of what sentences, fictions, non-fictions, and poems are; produces a new account of the logical form of fiction and of the limits of interpretation that follow from it; and delineates a new and fruitful domain of inquiry in which literature, philosophy, and science intersect.

The U.S. military has a stockpile of approximately 400,000 tons of excess, obsolete, or unserviceable munitions. About 60,000 tons are added to the stockpile each year. Munitions include projectiles, bombs, rockets, landmines, and missiles. Open burning/open detonation (OB/OD) of these munitions has been a common disposal practice for decades, although it has decreased significantly since 2011. OB/OD is relatively quick, procedurally straightforward, and inexpensive. However, the downside of OB and OD is that they release contaminants from the operation directly into the environment. Over time, a number of technology alternatives to OB/OD have become available and more are in research and development. Alternative technologies generally involve some type of contained destruction of the energetic materials, including contained burning or contained detonation as well as contained methods that forego combustion or detonation. Alternatives for the Demilitarization of Conventional Munitions reviews the current conventional munitions demilitarization stockpile and analyzes existing and emerging disposal, treatment, and reuse technologies. This report identifies and evaluates any barriers to full-scale deployment of alternatives to OB/OD or non-closed loop incineration/combustion, and provides recommendations to overcome such barriers.

The Art of Business Succession - Craig Holland - 2016-05-04
As the majority of baby boomers retire over the next five to 10 years, succession planning will be vital for the long-term survival of many businesses. Australia is about to see a huge transfer of wealth from the baby boomer generation, yet many businesses, particularly family-owned businesses, struggle to ensure a smooth transition of business management and ownership. Myriad studies show that fewer than 30 per cent of private businesses have an achievable succession plan in place. Most business owners do nothing or they choose to focus on one area in the succession planning process such as tax, while ignoring many of the other key issues that need to be dealt with. For companies that are family owned, the ramifications may be even more sweeping. The personal issues they face, compounding other day-to-day business concerns, range from planning for income taxes to maintaining interpersonal relationships with family members. Succession planning is more complex now as many different business, financial and personal issues come into play. A good succession plan will look at a range of issues such as people and talent, family dynamics, corporate structure, estate planning, insurance and share transfer to name just a few. The Art of Business Succession Planning is for anyone in business who wants to have a change, retire or simply sell their business. It is designed to guide business owners through a comprehensive and strategic approach to the business succession process. The opportunities and benefits are great when succession planning is undertaken in a disciplined way.

'Self-Help' is often viewed as the precursor of today's motivational and self-help literature. Here, Samuel Smiles' text is interpreted for the modern day world. Steve Shipside illustrates the timeless nature of Smiles' insights by bringing them to life through modern business, socio and political case studies. This brilliant interpretation of "Samuel Smiles' Self-Help" is an entertaining accompaniment to one of the most famous books on self-improvement ever written.
